About Cinagos

Natural Antimicrobial, Clean Beauty, Safer Products & Effective

Preservatives are essential in personal care products to prevent microbial growth, ensuring product safety and extending shelf life. Without them, products could become contaminated with bacteria, yeast, and mold, potentially causing harm to users and leading to product spoilage.

However, the term “preservatives” has taken on a negative connotation for some consumers, but preservatives are a healthy and normal part of everyday life. Humans have been finding ways to preserve food and other perishable products since ancient times. Today, just about any personal care products, including makeup, skin care products and other cosmetics, include a type of preservative in their ingredient list. Cinagos aims to provide preservatives solution to cosmetics and personal care manufacturer to make their products stay safe, fresh and hygienic for consumers.

Without preservatives, contaminated products can pose a risk to consumers, potentially causing skin infections or other adverse reactions. Besides, microbial growth can also affect the appearance, odor, and texture of a product, making it less appealing to consumers. So, our Preservatives help maintain the product's original quality and performance throughout their intended lifespan.

To reserve the negative connotation on preservatives, Cinagos has a series of natural preservatives to serve different needs of innovative natural formulation requirements. It is not only natural and effective, more important it is SAFE!

CINAGOS has the capabilities in house to perform MIC & Challenge test to check on the effectiveness of related preservatives on the formulation and we also have HET-CAM & CAMVA test to check on its irritation safety assessment. After tests, we will share all result with our customers.

Last we offer broadly effective preservation blends that optimally protect your cosmetic products and meet current technical and regulatory requirements. Please check out the following list.

Vision: Be global player in natural, effective preservation.

Mission: To revolutionize homecare & personal care preservation through nature-backed science & solutions

Preservatives free Anti-Microbial

Enabling preservative-free formulation that provide consumer a safer product.

PRODUCT LIST - 1

Veg. Origin	China INCI	Trade Name	INCI	Application Guide										Function	Physical Form
				SUN CARE	BODY SKIN CARE	BABY SKIN CARE	FACIAL CARE	INTIMATE CARE	HAIR CARE	MAKE UP	HOME CARE	PET CARE			
		Vegetables origin	 CHINA INCI approved												
Natural Preservative Package / Preservative Free Package															
		NatureGuard EVL 611	Citrus Limon Extract, Cinnamomum Cassia Bark Extract, Glycine Max (Soybean) Seed Extract, Butylene Glycol		*		*		*	*		*		This fully natural anti-microbial complex has a broad antimicrobial spectrum and has a good inhibitory effect on bacteria and fungi. The pure product is relatively mild, has no obvious irritation on skin contact, is non-toxic and non-sensitizing to the body, and has stress irritation to the eyes under normal use concentration. It is suitable for washing surface-active systems, and it works best when used in formulations with a pH level between 4.5 and 6.5.	Liquid; Dosage: 0.8%-1.2%
		NatureGuard CGE 613	Caprylhydroxamic Acid, Glyceryl Caprylate, Ethylhexylglycerin, 1,2-Hexanediol	*	*	*	*			*				NatureGuard CGE 613 is an effective stand-alone system that have a broad anti-microbial spectrum and have a good inhibitory effect on bacteria, yeast, and mold. Ideal for a 'Preservative Free' claim formulations. It can be used in water reagent, W/O, O/W emulsion systems. It has good water solubility. It can be used to make transparent products without solubilizing agents. Applicable pH: 4-8.	Liquid; Dosage: 0.5%-0.6%
		NatureGuard EVF 615	Gardenia Florida Fruit Extract, Rubus Fruticosus (Blackberry) Fruit Extract, Citrus Paradisi (Grapefruit) Fruit Extract, Salix Alba (Willow) Bark Extract, Butylene Glycol, Water	*	*	*	*		*	*				This fully natural anti-microbial complex has a broad antimicrobial spectrum and has a good inhibitory effect on bacteria and fungi. The pure product is relatively mild, has no obvious irritation on skin contact, is non-toxic and non-sensitizing to the body, and has stress irritation to the eyes under normal use concentration. It can achieve an ideal antimicrobial effect in a variety of skin care products, with a broad pH level between 4 and 8.	Liquid; Dosage: 0.8%-1.0%
		NatureGuard EJM 616	Foeniculum Vulgare (Fennel) Oil, Mentha Haplocalyx Oil, Citrus Limon (Lemon) Fruit Extract, Pelargonium Graveolens Oil, Polianthes Tuberosa Extract							*	*			NatureGuard EJM 616 is a pure plant extract blends designed specifically for effective mite killing. It is suitable for home care and pet care system like laundry detergent, laundry gel beads, mite removal spray, pet shampoo, etc.	Liquid; Dosage: 0.2%

Preservatives free Anti-Microbial

Enabling preservative-free formulation that provide consumer a safer product.

PRODUCT LIST - 2

Veg. Origin	China INCI	Trade Name	INCI	Application Guide										Function	Physical Form

Recommended
Dosage : 0.5-1.0%

pH Range: 4.5-6.5

PRODUCT BRIEF

Combining the natural extracts, this product gives broad anti-microbial spectrum and good inhibitory effect on bacteria and fungi. Unlike other extracts, these combination has high stability and long-term anti-microbial effect.

Latest lab results show NatureGuard EVL 611 also act as multifunctional ingredient including anti-acne, mite killing and skin & scalp micro-ecology balance.

INCI

CITRUS LIMON FRUIT EXTRACT, CINNAMOMUM CASSIA BARK EXTRACT, GLYCINE MAX (SOYBEAN) SEED EXTRACT, BUTYLENE GLYCOL

NatureGuard EVL 611

GLYCINE MAX (SOYBEAN)
SEED EXTRACT

CINNAMOMUM CASSIA
BARK EXTRACT

CITRUS LIMON (LEMON)
FRUIT EXTRACT

PRODUCT FEATURES

- 100% natural
- Broad anti-microbial spectrum
- Good compatibility with other preservatives (if necessary)
- Mite killing
- Anti Acne

APPLICATION

- Rinse-off Personal Care Products
- Household Hygiene Products

Recommended
Dosage : 0.5-0.6%

pH Range: 4-8

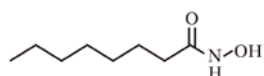

PRODUCT BRIEF

Combining Caprylhydroxamic acid and Glyceryl Caprylate to form the main antimicrobial active ingredients of this product, it has a broad antimicrobial spectrum and have a good inhibitory effect on bacteria, yeast, and mold. On top of that Ethylhexylglycerine changes the permeability of the cell membrane so that the antimicrobial component can efficiently penetrate the cell membrane and enter the cell body to exert its antimicrobial effect. With the synergistic 1,2-hexanediol, it increases the solubility of Caprylhydroxamic acid in the system and had a moisturizing effect at the same time.

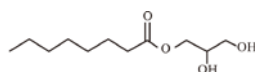

INCI

CAPRYLHYDROXAMIC ACID, GLYCERYL CAPRYLATE, ETHYLHEXYLGLYCERIN, 1,2-HEXANEDIOL

NatureGuard CGE 613

CAPRYLHYDROXAMIC
ACID

GLYCERYL CAPRYLATE

ETHYLHEXYLGLYCERIN

1,2-HEXANEDIOL

PRODUCT FEATURES

- An effective as a stand-alone system
- Broad antimicrobial spectrum and have a good inhibitory effect on bacteria, yeast, and mold
- Good water solubility. It can be used to make transparent products without solubilizing agents.

APPLICATION

- Water reagent, W/O, O/W emulsion systems.

Recommended
Dosage : 0.8-1.0%

pH Range: 4-8

PRODUCT BRIEF

Gardenia florida fruit extract is derived from the Gardenia florida fruit, which is widely used in skin care products. It contains flavonoids and phenol-like compounds, which has good anti-inflammatory and antibacterial properties, and has a certain inhibitory effect on some bacteria and fungi.

INCI

GARDENIA FLORIDA FRUIT EXTRACT, RUBUS FRUTICOSUS (BLACKBERRY) FRUIT EXTRACT, CITRUS PARADISI (GRAPEFRUIT) FRUIT EXTRACT, SALIX ALBA (WILLOW) BARK EXTRACT, BUTYLENE GLYCOL, WATER

NatureGuard EVF 615

GARDENIA FLORIDA
FRUIT EXTRACT

CITRUS PARADISI (GRAPEFRUIT)

SALIX ALBA (WILLOW)
BARK EXTRACT

PRODUCT FEATURES

- Natural-based
- Broad anti-microbial spectrum
- High stability and can have a long-term antimicrobial effect
- Good compatibility with other preservatives

(if necessary)

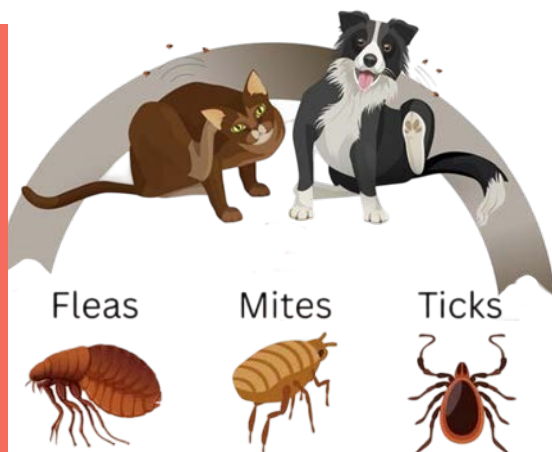

APPLICATION

- Leave-On Personal Care Products

Recommended
Dosage : 0.2%

pH Range: 4.0-7.0

PRODUCT BRIEF

Combining the natural extracts, this product gives effective mite, tick and flea killing within 24 hours.

Lab test result shows that in 0.2% NatureGuard EJM 616 aqueous solution, all mites are killed within 10 min. It is also safe for pets and won't cause irritation on skin and eyes.

It is widely used in home care and pet care products for removing parasites.

INCI

FOENICULUM VULGARE (FENNEL) OIL,
MENTHA HAPLOCALYX OIL,
CITRUS LIMON (LEMON) FRUIT EXTRACT,
PELARGONIUM GRAVEOLENS OIL,
POLIANTHES TUBEROSA EXTRACT

NatureGuard EJM 616

FOENICULUM VULGARE
(FENNEL) OIL

MENTHA HAPLOCALYX OIL

CITRUS LIMON (LEMON)
FRUIT EXTRACT

PRODUCT FEATURES

- 100% Natural plant-based mite/flea/tick killing agent
- Superior mite killing within 10 min in aqueous solution
- 0.2% addition for mite/flea/tick killing within 24h

APPLICATION

- Home Care
- Pet Care

PELARGONIUM GRAVEOLENS OIL

POLIANTHES TUBEROSA
EXTRACT

Recommended
Dosage : 1.0-1.2%

pH Range: 4-8

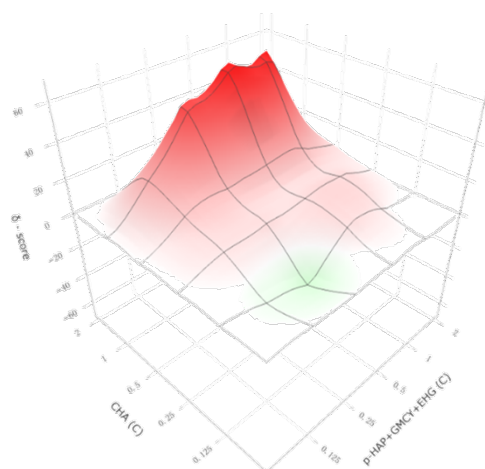

CHA (C) & p-HAP+GMCY+EHG (C)
HSA synergy score: 14.35

PRODUCT BRIEF

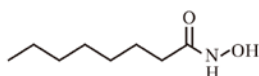

The NatureGuard CGH 620 takes the ISO 16128 international standard and the bio-based ¹⁴C testing method (ASTM D6866) dual certification as the core for defining natural preservative ingredients. The whole product reaches an NOI of 76%. Through scientific formulation and innovative processes, it constructs a highly efficient, safe and eco-friendly preservative system, promoting the sustainable development of natural cosmetics.

INCI

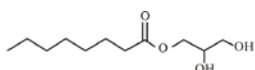

CAPRYLHYDROXAMIC ACID, GLYCERYL CAPRYLATE, ETHYLHEXYLGLYCERIN, HYDROXYACETOPHENONE, CHAMAECYPARIS OBTUSA LEAF EXTRACT, BUTYLENE GLYCOL

NatureGuard CGH 620

PRODUCT FEATURES

- From natural plant sources
- Design for intimate care products
- Safe, mild and efficient
- Multiple roles: Anti-microbial, Anti-acne agents, and Preservatives of products

APPLICATION

- Leave-on Intimate Care Products

CHAMAECYPARIS OBTUSA
LEAF EXTRACT

MAGNOLIA OFFICINALIS
BARK EXTRACT

Recommended
Dosage : 0.5-1.0%

pH Range: 3-10

PRODUCT BRIEF

90% of Phenoxyethanol and 10% of Ethylhexylglycerin combination are popular choice of many formulators. Common name know as PE 9010.

Our product is stand-out from the common grade because aligned to the ESG trend. The enzymatic derived Ethylhexylglycerin has lower carbon footprint. This help ESG practicing company on step closer to the lower carbon tax rate.

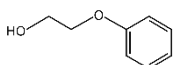

For the same effectiveness, why not get your company also contributing to the sustainability.

INCI

PHENOXYETHANOL, ETHYLHEXYLGLYCERIN

Fortis PE 9010

PHENOXYETHANOL

ETHYLHEXYLGLYCERIN

PRODUCT FEATURES

- An effective as a stand-alone system
- Broad antimicrobial spectrum and have a good inhibitory effect on bacteria, yeast, and mold
- High stability and can have a long-term antimicrobial effect.

APPLICATION

- Water reagent, W/O, O/W emulsion systems.
- It is recommended to add to the formulation below 50°C.
